The International Workshop on Intelligent Systems (IWIS 2024) will be held in International Hall in University of Ulsan, Ulsan, Korea, from Aug 28th – 31st, 2024. The Workshop offers a unique and interesting platform for scientists, engineers and practitioners throughout the world to present and share their recent research and innovative ideas in intelligent systems and their applications.

About IWIS

Rapid changes in information technologies have led to a boost in the strength and efficiency of human activity. These technologies have an influence on every area of human life, including education, science, business, leisure time, entertainment, government, and health care. Human life is greatly dependent on these systems' efficiency and performance. The IWIS has been prepared as a platform for exchanging ideas, knowledge, skills, and experiences in interactions between man and these systems. The IWIS series has become one of the most important international workshop in the field of intelligent systems.

Topic of Interests

Artificial Intelligence, Human Machine Interaction, Education and Training, Cyber Security in HSI, Sociological and Psychological Aspects of HSI, Cyber Physical Systems, Human Space Computing, Internet of Things and Smart Homes, Health Care and Assistive Devices, Extreme Interfaces, Humanity in Wireless Mesh Network, Vehicular System, Multimedia Human Communication, Personal Communication System, Personal Mobile Ad-hoc System, Wearable Network and System, Network Control and Management, Security, Privacy and Trust, Human Dependable System, Multi-agent System and Applications, Digital Twin.
